

# MANAGED CONTINUITY:

## Protecting your critical IT systems

# Are you prepared for the following?

- ② Damage from fire, flood or theft
- ② Losing data
- ② Back-up not working
- ② Downtime from IT issues
- ② Virus attacks
- ② Major server problems
- ② No email access

# We keep you and your IT systems protected...

## AVAILABILITY MONITORING

Anti-virus, connectivity and back-up

Regular reports and health checks

**Keeps you connected**

## RECOVERY MANAGEMENT

Data, archive and continuity services

Vulnerability and virus management

**Gets you up and running**

## SYSTEMS RISK CONSULTING

Quarterly risk audit  
Planning and testing

**Reduces risk of downtime**

# ...to keep your business running

## Before

*“Our back-up didn’t work and I lost access to an important customer email”*

*“Our office was flooded, resulting in no access to IT for several days. This has a massive impact on our sales”*

*“When our server goes down the whole office grinds to a halt, meaning lost revenue”*

## After

*“Back-up is done automatically, which saves me the stress and worry about accessing vital files”*

*“We’re now prepared for any major IT issue – whatever the cause – and have constant access to email and our data”*

*“Quarterly risk reports, archiving and a speedy recovery service mean downtime is no longer a threat to our business”*

# How does it work?

- ④ Take a step at a time or go for a full, integrated solution consisting of monitoring, recovery and risk analysis
- ④ Quick, simple set up which can be done remotely or at your premises
- ④ Free trials and demos available
- ④ Easy to use and no experience required
- ④ Affordable – just a small, monthly fee per workstation
- ④ Developed to meet the requirements of small and medium sized businesses
