

MANAGED WORKSTATIONS:

Keeping your IT running

What state are your PCs in?

- 📊 Systems running slowly?
- 📊 PCs or laptops crashing for no reason?
- 📊 Too much time trying to resolve simple IT issues?
- 📊 Out-of-date software?
- 📊 Lack of in-house resources to fix things?

Three steps to a complete solution.....

MONITORING

24/7 PC health check
Identifies issues early on
Keeps your
business running

MAINTENANCE

Automatic patches
and updates
Improves PC performance
Helps you to work smarter

SUPPORT

Combines monitoring
and maintenance
Helpdesk support
Reduces downtime

Making a difference...

Before

“We don’t know how up-to-date our workstations are or if they are at risk from any future problems”

“My laptop was running slowly and I had no idea why or what to do about it which was very frustrating”

“PCs in our office would freeze for no apparent reason, resulting in time lost which could have been spent on sales”

After

“With 24/7 monitoring of our PCs, we now have a clear picture of their performance and improvements that are required”

“Through remote monitoring and automatic maintenance I can perform tasks much more quickly ”

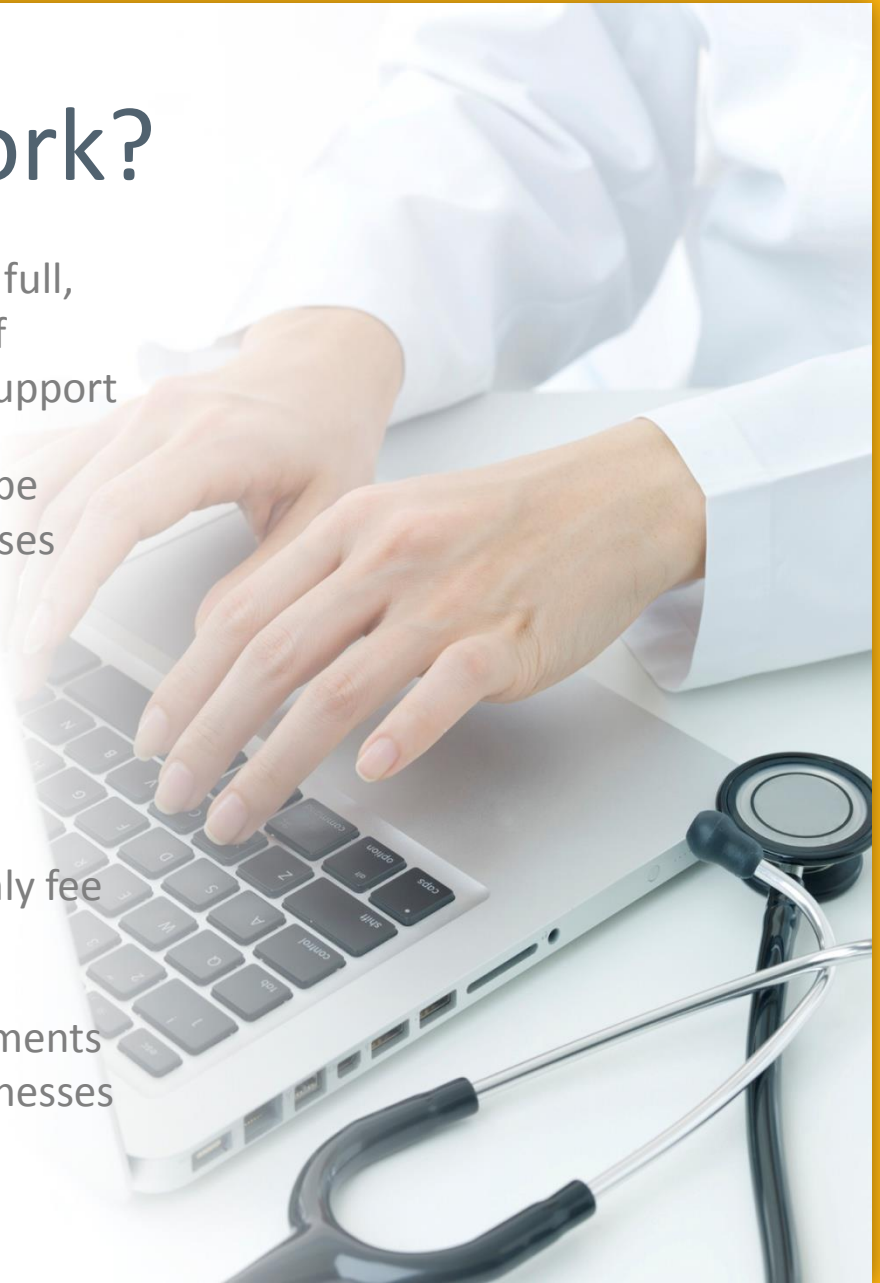

“With support always available, any issues are quickly resolved meaning we can be up and running in no time”

How does it work?

- Take a step at a time or go for a full, integrated solution consisting of monitoring, maintenance and support
- Quick, simple set up which can be done remotely or at your premises
- Free trials and demos available
- Easy to use and no experience required
- Affordable – just a small, monthly fee per workstation
- Developed to meet the requirements of small and medium sized businesses
